

Cross Country Trial

On Friday, 25 May Bullsbrook College hosted our annual Cross Country trials in preparation for the MDSA Interschool Cross Country competition. Years 2 to 6 ran distances according to those set by the MDSA committee and hosts of the upcoming competition Gingin DHS. Students ran in boy and girls races to help alleviate foot traffic on the course. I cannot praise the kids highly enough, 90% of the primary campus took part in the trials and every student's efforts was outstanding. The fastest three girls and boys from each year group category have made the Bullsbrook College Interschool team and will travel to Gingin DHS on Friday 8th June to compete against another seven schools.

MDSA Interschool Cross Country

On Friday, 26 May a group of 30 students from Year 2 to 6 made the short journey to Gingin Golf Club to participate in the annual MDSA Interschool Cross Country Carnival. Students walked the course in their respective year groups with the help of host school Gingin District High School. Once familiar with the course, students were called up in their year group and gender to compete against another 24 students from six different schools; Gingin, Bindoon, Yanchep Beach, Yanchep District High School, Lancelin, Toodyay and Immaculate Heart. While we did not leave with any trophies this year, we had some amazing individual performances from Deegan King and Ajoh Lual. The students represented Bullsbrook College beautifully and were a credit to the school. The weather was fantastic with the sun shining throughout the day. Thank you to all the parents who came and supported the students. It's always great to see.

STRIVE & ACHIEVE

YEAR 10 OED

The Year 10 Outdoor Education class went on an excursion to The Hangout in Bayswater on Tuesday, 12 June where they learnt and demonstrated skills relating to rock climbing, preparing them for their Year 11 camp. The aim of the Year 10 Outdoor Education course is to give students a glimpse into skills and theory work required for Senior School General Outdoor Education.

The students were all on their best behaviour and demonstrated skills to a proficient standard, after only learning them in the morning of the excursion with no prior knowledge or skill set. Students overcame fears of heights and personal challenges throughout the day. They performed not only rock climbing skills to climb the wall, but, also safety skills as a belayer (person on the ground who is responsible for the climbers' safety) to ensure their partner was safe at all times.

Some students were initially apprehensive about what the day may have in store for them, but overall the feedback from students was positive and they all had an amazing time.

ST VINNIES WINTER APPEAL

Blankets, warm jackets, clothes and toiletries are very important for those in need. They help to bring some dignity to people who may be experiencing hard times. Thank you very much to all who have donated. We will pass these items on to St Vincent de Paul on your behalf.

Compassion and kindness goes a long way!

Right: School Officer, Julie, with some beautifully crocheted blankets brought in by a generous member of our community.

Year 10 Building and Construction

Students learned about the design process and construction stages of a house. Tasks required students to design a floor plan and construct a scaled model house from recycled materials. Students enjoyed learning about the building process and put in a lot of effort to complete their projects. Sophie Papich and Lily Smith (pictured) worked exceptionally well and added extra details to their houses. Both of those projects are now on display in the school's Main Reception.

LOOK UP

Feel like listening to some kind words and good advice?

Go to Youtube and watch "Look Up" by Gary Turk.

We live in a busy world – a world where many of us want for very little in the way of "things" and "stuff". Yet so many of us are victims of "devices of mass distraction" – screens. The consequences are "smart phones and dumb people"; children being parented by electronic devices; agitated and angry children and adolescents who spend too much time indoors in front of screens.....just to list some of the issues associated with excessive use of screens. So here's a challenge

"Look up from your phone. Shut down that display. Stop checking your Facebook. Live life the real way!"
